

King County

Parks and Recreation Division

Department of Natural Resources and Parks

**Neighborhood Meeting Summary
East Lake Sammamish Master Plan Trail –South Sammamish Segment A
Contract No. C00796C13**

July 28, 2014

5 –7 p.m.

East Lake Sammamish Trail at 39th Ave SE

(3803 East Lake Sammamish Shore Lane SE to 4011 East Lake Sammamish Shore Lane SE)

Meeting Overview:

- Frank Overton, King County Parks, greeted attendees, introduced project staff, and explained the purpose of the meeting. King County is advancing design of the South Sammamish Segment A of the East Lake Sammamish Trail. Preliminary Trail Alignment Plans are now available and the design team is available tonight to explain the plans, answer questions, and collect comments. King County is committed to being a good neighbor and wants to hear from trail neighbors and the public early and often during design and construction. He encouraged attendees to submit comments and contact the project team anytime to provide comments or ask questions.
- All meeting attendees were asked to sign-in and received a packet of information that included recent newsletters for South and North Sammamish, informational project handouts, and a comment form. Trail neighbors received a personalized set of the design plans for the trail section adjacent to their home.
- Jenny Bailey, Parametrix provided an overview of the Preliminary Trail Alignment Plans and design criteria. Jenny explained that this segment is relatively unconstrained – there are only a small section where the trail must shift closer to private properties to avoid impacts to environmentally sensitive areas, as required by local, state, and federal regulations. The design team is focusing on preserving trees as much as possible. An arborist will look at all trees within close proximity to the construction limits to assess overall tree health and determine whether the tree can be preserved. Jenny explained that the centerline of the paved trail is staked to provide a visual cue of the proposed trail improvements. Jenny provided an overview of how to read the design plans and encouraged attendees to refer to their individual plan set throughout the meeting. Jenny Bailey led a walking tour from 3803 East Lake Sammamish Shore Lane SE to 4011 East Lake Sammamish Shore Lane SE. explaining the proposed alignment and key design features. Attendees were encouraged to ask questions and provide comments throughout the meeting.

King County

Parks and Recreation Division

Department of Natural Resources and Parks

Comment Summary:

- Approximately 14 trail neighbors attended the meeting and provided the following questions and comments.
 - Will there be barriers (fences) on either side of the trail?
 - Several questions and comments about trail alignment.
 - Why is the centerline shifting?
 - Have you considered widening to the east?
 - Seems like a waste of taxpayer dollars to remove and relocate fence – shift trail east.
 - Concern for bicycle speed and safety along the trail.
 - Several requests to install signs, speed bumps, or other measures to calm bicycle traffic.
 - Have you considered a bike lane to separate cyclists from pedestrians?
 - Will the guardrail adjacent to parking area at 39th be replaced?
 - Could the City of Sammamish install signs on the driveway at 39th to direct traffic one way?
 - Property owner at 4007 and 4009 East Lake Sammamish Shore Lane SE would like to build a retaining wall following construction and has concerns regarding drainage.
 - Petrankos also noted that one of the sets of stairs for their property could be removed. King County will coordinate during construction.
 - What is happening to the stop signs along the trail?
 - There were several questions and comments related to trees and landscaping:
 - Concern about trees recently trimmed by King County crews.

King County

Parks and Recreation Division

Department of Natural Resources and Parks

- Trees provide privacy and shield noise. Preserve trees along the corridor.
- When will we know which trees will be removed?
- Leyland Cyprus trees as well as other trees planted by lakeside property owners on King County property obstruct view of the lake from upland properties and public areas. Will they be removed?
- Trees reduce light glare from East Lake Sammamish Parkway.
- Will you landscape the terrace?
- Mr. Bacic had several concerns about trees. King County staff will follow up with Mr. Bacic to discuss his concerns further.

Please share your questions, comments, and concerns below:

I attended the East Lake Sammamish Trail meeting on July 28. I am very much in favor of this trail and have been since the beginning. I live across the parkway from the trail, but am a member of Muncho Park Beach Community on 4099 East Lake Sammamish Shore Lane, so I am on the beach side and across from the beach. I was disappointed to hear that King County has taken the "stance of saving all tree whenever possible". Some lake neighbors planted these fast growing trees on County property several years ago and they now block or will block some of our neighborhood views. This impacts the enjoyment of our homes and the value of our property. At one point we were shown where the center line had been moved East to the edge of the trail to save some of these monster trees. This will mean additional costs to shore up the Parkway (see comments on back)

Was today's meeting helpful? Yes No

Please share your thoughts below on the meeting content and format.

casual - informative, but on the issue of trees the decision seemed to already be made.

How do you prefer to receive project information?

Do you have any other comments or suggestions for improving the community outreach process?

on the east side of the trail so taking this position does not seem to be economics, but political. I would like to see these leyland cypress trees trimmed or removed.

Seattle, WA 98104

Dear Bob,

Thank you for your ongoing interest in King County's design and construction of the East Lake Sammamish Trail. All of the comments from our summer trail neighbor meetings were provided to the design team to be reviewed and considered as the trail design advanced.

We received and reviewed your comment concerning landscaping and trees. King County previously responded to your comment regarding these issues in an email delivered on August 8, 2014.

Throughout the environmental and design processes, King County Parks has committed to reducing impacts to the adjacent environment and homeowners whenever possible. Removal of trees and vegetation has been limited to the area that conflicts with trail construction and improved sightlines and includes removal of some unhealthy trees identified by the Arborist that are outside of trail construction.

The project includes new landscaping to restore the project area and to achieve the following goals and objectives:

- Increase trail safety by improving sightlines at all trail intersections. This includes installing plants that grow to a maximum of three feet at full maturity to ensure sightlines are maintained.
- The most immediate function of trail landscaping is to restore open ground areas with landscape mulch and plantings or seeding to prevent erosion
- Installing native plants, shrubs, and groundcover offer many benefits including; they are well adapted to thrive in local conditions of drought or excess moisture; require less maintenance; grow to natural sizes and forms; blend well into the natural surroundings along the trail corridor
- Contribute to a sense of visual continuity along the trail corridor and help make the trail feel like a park.
- In all cases, the species planted along the trail corridor will be appropriate for the context with consideration given to size at maturity.

The Arborist's conservation plans for South Sammamish segment A will be published to the project website in mid-September.

For additional information on the East Lake Sammamish Master Plan Trail project, please visit the project website at: www.kingcounty.gov/eastlakesammamishtrail.

You may follow our blog (<http://kingcountyparks.wordpress.com/>) for frequent updates about the East Lake Sammamish Trail and other King County Parks projects.

If you still have a specific question, King County would be happy to meet with you. You may set up an appointment by calling the project hotline at 1-888-668-4886 or email ELST@kingcounty.gov.

Sincerely,

Gina Auld
Capital Project Manager
