

LAKE TO SOUND TRAIL

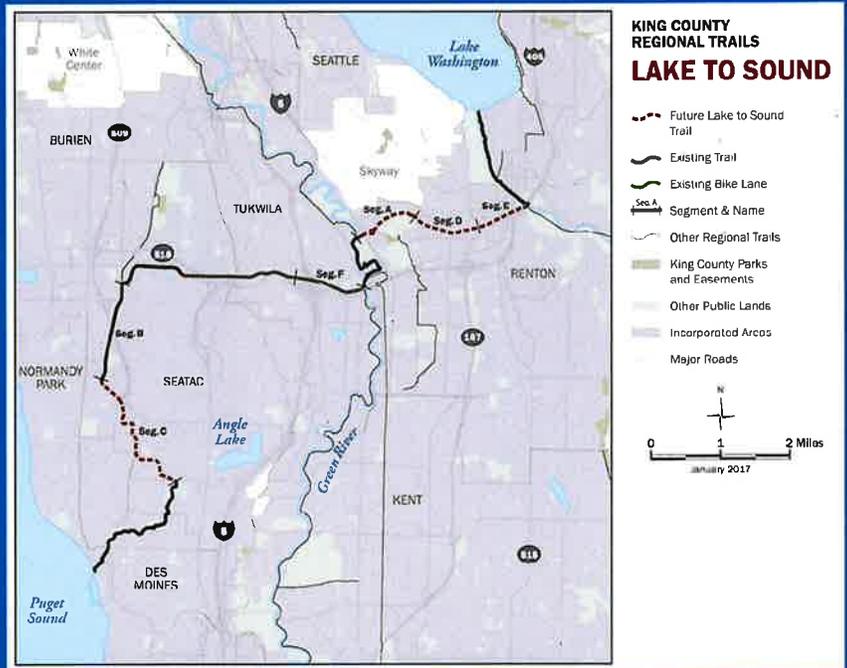

The Lake to Sound Trail, once complete, will be a 16-mile non-motorized, multi-use recreational trail spanning from the south end of Lake Washington in Renton, all the way to the shoreline of Puget Sound in Des Moines.

One of the first trails to make connections between our larger network of Regional Trails System, the Lake to Sound Trail will use a variety of methods – a separated path, roadside sharrows, and sidewalk shared path – to complete the length of the trail.

Designed and constructed in segments, as funding allows, the construction includes a 12-foot-wide asphalt trail with two-foot soft surface shoulders and one-foot clear zones on each side of the trail, as well as other elements like retaining walls, improved intersections/traffic controls, improved drainage systems, culverts, bollards, native landscaping, fencing, art, and other trail amenities.
