Kent-Auburn conveyance system improvements (Phase B)
Sewer pipeline work in Pacific, Algona & Auburn

Completed – Summer 2019

**Project description**

Since 2008, King County Wastewater Treatment Division has been working to improve the wastewater system in southeast King County. In 2014, the County completed two new pipelines in Kent and Auburn (See Phase A info here).

The second phase of the project involved building 14,000 feet of new sewer line in Pacific, Algona, and Auburn, and making upgrades to the Pacific Pump Station.

**Project schedule**

24-hour emergency and odor reporting:

Construction photos

A crew member inspects a dewatering pipe. This pipe removed groundwater during construction to allow crews to successfully install the green force main pipe underground.

Crews dug a trench to install pipe underneath Frontage Road in Pacific.

Crews used trench boxes to hold back soil while installing pipe alongside Perimeter Road in Auburn.

**January 21, 2017 - Open house**

January 21, 2017
10:30 am to 12:30 pm at Algona City Hall,
402 Warde St., Algona

**Project Open House.** Please join us to learn more about the work taking place in Algona:

- Where and when will the work take place?
- What will it involve?
- How can you keep informed about the project?

An open house format with staff there to answer your questions about the project. Stop by any time during the open house – stay for as long as you like!
